

# Is Commercial Television Harmful to Society?

*Investigation in exotic subliminal programming in the sub-audio range (ELF [below 50hz]) that induce human nervous system response with the associative imagery.*

Soliciting volunteers. Text me at 702-907-8353 with your contact, real name and your age. Study is non-invasive that includes a basic written survey and exposure to TV programming for an hour per volunteer while wearing an EEG band.

I would like volunteers that are a mix of TV watchers and folks who have not consumed TV for a number of years.

Because this study is independent and taking place in a private residence, background checks may be run on each volunteer. Anyone that is a mutual in relation to me that is vetted is a requirement.

Anyone 18 or older please.

Thank you, Jason Page
